Description

The Versapor R membrane is an acrylic copolymer membrane cast on a nonwoven nylon support. It is Repel™ treated for superior oleophobicity and hydrophobicity. The membrane is also available in a thinner version, on a nonwoven polyester support.

- Oleophobic/hydrophobic
- Excellent air permeability
- Broad chemical compatibility
- Compatible with a variety of sealing methods
- Excellent handling properties
- Manufacture is carried out according to procedures within a quality management system certified to ISO9001

The Versapor R membrane is repellent to a variety of fluids including, but not limited to, the following:

- Body fluids
- Lipid solutions
- Water
- Oils
- Organic solvents
- Gasoline
- Starter fluid
- Brake fluid
- Transmission fluid
- Steering fluid
- Wiper fluid

Specifications

Dimensions

Custom roll, sheet, and disc sizes available

Please contact your local Pall representative for more information.

Packaging

Core: 7.6 cm (3.0 in) ID, PVC
Packaging: For widths up to 22.86 cm (9.0 in), shrink-wrap around each roll; for widths 22.86 cm (9.0 in) and larger, bag around each roll

Qualification Services

Pall Corporation offers qualification services to support regulatory compliance.

Benefits of Venting

- Contamination control
- Controlled air/gas exchange rates
- Cost savings
- Design flexibility
- High permeability rates
- Higher throughput; increased fill rates
- Increased system reliability
- Parts remain free of corrosion
- Pressure equalization
- Reactive surfaces are not poisoned
- Sensing surfaces protection
- Short circuits are prevented
- Temperature stabilization
# Applications and Media Requirements by Industry

## Automotive

**Application**
- ABS brake systems
- Air conditioning pressure sensors
- Electric motors: windows, windshield wipers
- Electronic control units
- Fuel tanks: pressure sensors, gas caps, roll-over valve protection
- Lighting assemblies: headlight, taillight
- Powertrain control units

**Media Requirements**
- Easily die cut and sealed
- Good chemical resistance
- High mechanical strength
- High permeability
- High repellency to gasoline and other automotive fluids
- High vapor transport rate
- Low back pressure

## Electronics

**Application**
- Acoustically transparent microphone protection
- Enclosure vents
- Micro-Electro-Mechanical Systems (MEMS) protection
- Portable electronic devices
- Transducer protectors
- Vented packaging

**Media Requirements**
- Easily die cut and sealed
- Good chemical resistance
- High acoustic transparency
- High water intrusion pressure
- Low back pressure
- Resistant to salt water
- Resistant to UV
- Thin or low profile

## Food and Beverage

**Application**
- Food packaging: processing, moisture protection, shipping
- Liquid bottling: filling, packaging, shipping
- Thermal vents
- Vented cap and lid liners

**Media Requirements**
- Easily customized for unusual shapes
- Easily die cut and sealed
- Good chemical resistance
- Good mechanical strength
- Good repellency
- High permeability
- High temperature resistance

## Other Industrial Applications

- Cap and lid vents
- Moisture barriers
- Packaging vents
- Reactive product packaging
- Sensor protection

---

1. This table is intended to serve as a guide only. Since applicable regulations and requirements may differ from country-to-country, please contact your local Pall representative for specific information.

2. The Versapor R membrane is used in a variety of Industrial markets and applications. For information about those not listed above, please contact your local Pall representative.
### Chemical Resistance

**Acids**
- Acetic acid - 10%
- Acetic acid - 30%
- Hydrochloric acid - 1N (3.3%)

**Alcohols**
- Amyl alcohol
- Benzyl alcohol
- Butanol
- Ethanol
- Isopropanol
- Methanol
- n-Propanol

**Aromatic Hydrocarbons**
- Benzene
- Toluene
- Xylene

**Bases**
- Ammonium hydroxide - 3N (5.7%)
- Ammonium hydroxide - 6N (11.4%)
- Potassium hydroxide - 3N (15%)
- Sodium hydroxide - 3N (11%)
- Sodium hydroxide - 6N (22%)

**Esters**
- Amyl acetate
- Butyl acetate
- Cellosolve acetate
- Ethyl acetate
- Isopropyl acetate

**Ethers**
- Ethyl ether
- Tetrahydrofuran/water (50/50 v/v): limited resistance
- Isopropyl ether

**Glycols**
- Ethylene glycol
- Glycerol
- Propylene glycol

**Halogenated Hydrocarbons**
- Carbon tetrachloride
- Ethylene dichloride
- Tetrachloroethylene
- Freon TF: limited resistance
- Genesolv D
- Perchloroethylene
- Trichloroethylene

**Ketones**
- Methyl isobutyl ketone

**Miscellaneous**
- 18 MOhm water
- Acetonitrile
- Formaldehyde - 37%
- Formaldehyde - 4%
- Gasoline
- Hexane - dry
- JP-4
- Kerosene
- Pyridine: limited resistance
- Skydrol 500
- Water

**Oils**
- Cottonseed
- Peanut
- Sesame

---

3 The Versapor R membrane has demonstrated resistance to the chemicals on this list.

4 This table is intended to serve as a guide only. Accuracy cannot be guaranteed. Users should verify chemical compatibility with their specific membrane under actual conditions. Additional information about Pall materials is available online at www.pall.com/industrialmaterials.
